PRESS RELEASE

ANOTHER QUARTER OF CONTINUOUS GROWTH

Singapore, August 4, 2009: Sembcorp Marine delivered another quarter of continuous growth with an 8% increase in Group attributable profit to \$138.1 million from \$128.3 million in 2Q 2008. Group turnover registered an 8% increase to \$1,497.6 million as compared with \$1,386.1 million for the corresponding period in 2008.

Group operating profit at \$166.7 million was 50% higher than the same quarter in the previous year. Group pre-tax profit increased 11% to \$178.9 million from \$160.7 million in 2Q 2008 attributable to higher operating margins from rig building projects, offset mainly by the lower contribution from Cosco Shipyard Group.

For the half year, Group turnover at \$2,861.1 million was 24% above the \$2,302.2 million for the corresponding period in 2008. Group operating profit increased 58% to \$301.3 million as compared with \$190.9 million the previous year. At the pre-tax level, Group profit increased 20% to \$330.1 million from \$275.9 million in 1H 2008. The increase was due mainly to higher operating margins from rig building, offshore and ship conversion projects offset by the lower contribution from the Cosco Shipyard Group.

Group attributable profit for 1H 2009 at \$258.3 million was 18% higher as compared with \$219.6 million recorded in 1H 2008.

Interim Dividend

In line with the Group's strong performance for 1H 2009 and the need to conserve cash for growth opportunities, the Board of Directors is recommending an interim one-tier tax-exempt dividend of 5.00 cents per share.

The one-tier interim dividend will be paid to shareholders on 1st September 2009.

Outlook

The Group has a net order book of S\$7.91 billion with completion and deliveries stretching till early 2012. This includes the S\$1.12 billion order contracts secured to-date since the end of 2008 comprising the building-up of two units of ultra-deepwater harsh environment semi-submersible rigs from bare-deck hulls for subsidiaries of SeaDragon Offshore Limited, two offshore platforms for Premier Oil Natuna Sea and an FPSO conversion for Modec.

Notwithstanding the current economic downturn and the restricted financing and liquidity environment for owners, the long-term fundamentals for the marine and offshore industry remain resilient with oil prices back to the US\$60 to US\$70/bbl range.

For ship repair, the near term prospect is challenging. Nevertheless, our bigger docks are at present well-booked due to the strong support of the Group's Alliance/FCC and regular customers and its niche market segment of LNG carriers.

The market for FPSO units and production platforms is expected to remain unchanged as these projects have longer gestation periods and constitute part of the owners' investment portfolio designed to provide future output to replace depleting reserves.
